System x3100 M5

Lenovo Press Product Guide

The System x3100 M5 single-socket tower server is designed for small businesses and first-time server buyers looking for a solution to improve business efficiency. It delivers several innovative features with a competitive price, either in a compact mini-tower form factor, or standard tower form factor with hot-swap power supplies and disk drives. The System x3100 M5 provides next-generation performance in an innovative and compact design with flexible configuration options, built-in security, and systems management capabilities. It leverages the next-generation dual-core and quad-core Intel Xeon processor technology.

Suggested uses: Retail/kiosks, and SMBs, looking for file and printer servers, web serving, small business infrastructure, and virtual desktops for small workgroups.

Did you know?

The System x3100 M5 server is a compact, cost-effective, single-processor tower or rack-mountable server that has been optimized to provide outstanding availability, manageability, and performance features to small-to-medium-sized businesses, retail stores, or distributed enterprises. It supports the Intel Xeon E3-1200 v3 “Haswell” family of processors for applications that require performance and stability, and Core i3, Pentium, and Celeron processors for applications that require lower cost.

The system includes features that are not typically seen in this class of system, such as standard, embedded RAID 0 and RAID 1, remote control capabilities even when the machine is powered off, and Predictive Failure Analysis (PFA) on processor and memory. Some models also support hot-swap redundant power supplies and hot-swap disk drives.

Key features

Often, small-to-medium sized businesses (SMBs) have limited IT budget and resources, and rely on partners or multitalented employees to help manage the company's network. Business needs for efficiency improvement and retention of critical data require the usage of a server that is easy to get up and running quickly and is dependable. You need to squeeze as much as possible out of your IT dollars while saving costs on features that are not needed in an SMB environment. The System x3100 M5 is an ideal first server to meet those business needs. It was built for speed, yet eliminates costly design features that are found in general-purpose servers that are unnecessary for smaller businesses.

Scalability and performance

The x3100 M5 offers numerous features to boost performance, improve scalability, and reduce costs:

- The single-socket x3100 M5 supports the quad-core Intel Xeon Processor E3-1200 v3 ("Haswell") family of processors, which offer impressive computing power in a space-saving mini-tower design.
- Choice of processors with up to four cores to enable the effective usage of multi-threaded applications.
- Intel Xeon Processor E3-1200 v3 family supports Intel Hyper-Threading Technology and Intel Turbo Boost Technology 2.0 to maximize performance.
- Up to 32 GB of high-speed DDR3 system memory with four DIMM sockets.
- Memory speeds up to 1600 MHz.
- Four available high-performance PCI Express 3.0 or 2.0 slots.
- Up to four internal 3.5-inch simple-swap or hot-swap SATA II HDDs on some models offer low-cost/high-capacity storage.
- Up to eight internal 2.5-inch hot-swap SAS/SATA HDDs on some models offers maximum scalability and performance.
- Integrated ServeRAID-C100 software RAID controller supports RAID 0, 1, and 10. Hardware RAID options are available.
- Integrated dual-port Gigabit Ethernet provides increased network throughput and redundancy with efficient slot-saving integration.
- An available 5.25-inch drive bay supports either a half-high tape drive or an RDX Removable Disk Cartridge drive, for cost-effective data backup. A DVD-ROM drive is standard in a dedicated bay.
- Seven USB ports, two USB 3.0 on the front and four USB 2.0 on the back. In addition, there is one internal port for use with a tape drive or RDX Removable Disk Cartridge drive.

Availability and serviceability

The x3100 M5 provides many features to simplify serviceability and increase system uptime:

- ECC memory provides error correction that is not available in PC-class "servers" that use parity memory. Avoiding system crashes (and data loss) because of soft memory errors can mean greater system uptime.
- Tool-less cover removal provides easy access to upgrades and serviceable parts, such as CPU, memory, and adapters.
- Hot-swap drive bays that are available on some models combined with RAID capabilities offer the potential of no downtime in the event of a drive failure.

- The Predictive Failure Analysis (PFA) detects when system components (for example, processors, memory, and hard disk drives) operate outside of standard thresholds and generates pro-active alerts in advance of possible failure, therefore increasing uptime.
- Built-in Integrated Management Module Version II (IMM2) continuously monitors system health, triggers alerts, and performs recovering actions in case of failures to minimize downtime.
- Built-in diagnostic tests using Dynamic Systems Analysis (DSA) Preboot speeds up troubleshooting tasks to reduce service time.
- A DVD-ROM drive is standard in a dedicated bay for easy software installation.
- Redundant hot-swap power supports on some models helps keep the server always running
- One-year customer replaceable unit and onsite limited warranty, next business day 9x5. Optional service upgrades are available.

Manageability and security

Powerful systems management features simplify local and remote management of the x3100 M5:

- The server includes an Integrated Management Module II (IMM2) to monitor server availability and perform remote management (some features require optional license upgrades).
- Integrated industry-standard Unified Extensible Firmware Interface (UEFI) enables improved setup, configuration, and updates, and simplifies error handling.
- Integrated Trusted Platform Module (TPM) 1.2 support enables advanced cryptographic functions, such as digital signatures and remote attestation.
- Intel Xeon Processor E3-1200 v3 family supports Industry-standard Advanced Encryption Standard (AES) NI support for faster, stronger encryption.
- IBM Systems Director is included for proactive systems management. It offers comprehensive systems management tools that help to increase up-time, reduce costs, and improve productivity through advanced server management capabilities.
- The Intel Execute Disable Bit function can help prevent certain classes of malicious buffer overflow attacks when combined with a supporting operating system.

Energy efficiency

The x3100 M5 offers the following energy-efficiency features to save energy, reduce operational costs, increase energy availability, and contribute to a green environment:

- Energy-efficient planar components help lower operational costs.
- Available 350 W power supply, 300 W 80 PLUS Bronze certified power supply, or 430 W hot-swap 80 PLUS Silver certified power supply.
- With the addition of the Operating Temperature Enhancement Kit, the server supports the ASHRAE A3 standard, which means the server can operate in temperatures as high as 40°C. This means potential savings in environmental cooling costs.
- The Intel Xeon processor E3-1200 v3 product family offers significantly better performance over the previous generation while fitting into the same thermal design power (TDP) limits.
- Low-voltage Intel Xeon processors draw less energy to satisfy demands of power and thermally constrained data centers and telecommunication environments.
- The server uses hexagonal ventilation holes, a part of Calibrated Vectored Cooling™ technology. Hexagonal holes can be grouped more densely than round holes, providing more efficient airflow through the system.

Locations of key components

The x3100 M5 is available in two different tower designs: a compact tower with a fixed power supply and simple-swap drive bays, or a standard tower with hot-swap power supplies and hot-swap drive bays. Figures 2 and 3 show the front and rear of the x3100 M5.

Standard specifications

The following table lists the standard specifications.

Table 1. Standard specifications (part 1 of 2)

Components	Specification
Form factor	Two designs: ● Compact tower (can be a 4U rack form factor using the optional Tower-to-Rack Conversion Kit, 69Y5182). ● Standard Tower (can be a 5U rack form factor using the optional Tower-to-Rack Conversion Kit, 00J6353).
Processor	One Intel “Haswell” processor as listed in model table or available CTO: ● One 2-core Intel Celeron Processor 2.8 GHz and 1333 MHz memory. ● One 2-core Intel Pentium Processor up to 3.4 GHz and 1600 MHz memory. ● One 2-core Intel Core i3 Processor up to 3.7 GHz and 1600 MHz memory. ● One 2 or 4-core Intel Xeon E3-1200 v3 up to 3.7 GHz & 1600 MHz memory. Supports EM64T for 32-bit and 64-bit operating systems and applications.
L3 cache	Integrated in the processor: ● Up to 2 MB for Intel Celeron processors. ● Up to 3 MB L3 for Intel Pentium processors. ● Up to 4 MB L3 for Intel Core i3 processors. ● Up to 8 MB L3 for Intel Xeon E3-1200 v3 processors.
Chip set	Intel C222, formerly known as Intel Lynx Point PCH and Intel Denlow platform.
Memory DIMM slots	Four DDR3 DIMM slots supporting UDIMMs. RDIMMs are not supported.
Memory capacity	Up to 32 GB with 8 GB DDR3 UDIMMs and four populated DIMM slots.
Memory protection	ECC.
Disk drive bays	Compact tower: Up to four 3.5" simple-swap bays Standard tower: Up to four 3.5" hot-swap bays (HDDs) or eight 2.5" hot-swap bays (HDDs or SSDs)
Maximum internal storage	Compact tower: Up to 12 TB with 3 TB 3.5" simple-swap NL SATA HDDs. Standard tower: Up to 24 TB with 6 TB 3.5" hot-swap NL SATA HDDs or up to 8 TB with 1 TB 2.5" hot-swap NL SAS HDDs or upto 12.8 TB with 1.6 TB 2.5" hot-swap SSDs
RAID support	Software RAID 0, 1, or 10 with ServeRAID C100 controller, upgradeable to RAID 5. Optional hardware RAID with ServeRAID H1110 (RAID 0, 1, 1E, or 10) or M1115 (RAID 0, 1, 10, optional RAID 5, or 50) or M5110 (RAID 0, 1, 10, optional 5, 50, 6, or 60, and optional cache with flash backup). Additional upgrades for M5110. *For compact tower*: using the hardware RAID adapter also requires a RAID upgrade kit (00J6352).
Optical drive bays	One 5.25" HH bay, support for DVD-ROM or multiburner. Half-High SATA DVD-ROM or multiburner included in standard models (model specific).
Tape drive bays	One 5.25" HH bay, support for DDS, RDX, or LTO drive.
Network interfaces	Integrated two-port Gigabit Ethernet (Broadcom BCM5717). One port is shared with the Integrated Management Module (IMM).
PCI expansion slots	Four PCI Express slots: ● Slot 1, PCIe 3.0 x16 (x8 wired), full-height, half-length. ● Slot 2, PCIe 3.0 x8 (x8 wired), full-height, half-length. ● Slot 2, PCIe 2.0 x8 (x4 wired), full-height, half-length. ● Slot 4, PCIe 2.0 x4 (x1 wired), full-height, half-length.

Table 1. Standard specifications (part 2 of 2)

Components	Specification
Ports	*Front*: Two USB 3.0 ports. *Rear*: Four USB 2.0, one DB-15 video, one DB-9 serial, two RJ-45 Gigabit Ethernet network ports (one dedicated and one shared with the IMM2 management processor). *Internal*: One USB 2.0 port for internal USB tape drive.
Cooling	*Compact tower*: Up to two speed-controlled non-redundant fans. A second fan is required if two or more adapters are installed (Thermal Solution Fan kit, 46W9177, optional). Optional Operating Temperature Enhancement Kit, 00Y8197, to enable the server to operate in a 40°C environment. *Standard tower*: Up to two speed-controlled non-redundant fans. A second fan is required if two or more adapters are installed (Thermal Solution Fan kit, 00Y8200, included in standard models). Optional Operating Temperature Enhancement Kit, 00FK940, to enable the server to operate in a 40°C environment.
Power supply	*Compact tower*: One fixed (non-hot-swap) power supply, model dependent: Either 300 W ac 80 PLUS Bronze power supply or 350 W ac power supply. *Standard tower*: Up to two 430 W hot-swap 80 PLUS Silver redundant power supplies.
Hot-swap parts	*Compact tower*: None. *Standard tower*: Disk drive bays and power supplies.
Systems management	UEFI, Integrated Management Module II (IMM2), basic light path diagnostic tests, Automatic Server Restart, IBM Systems Director, and ServerGuide. Optional IMM Advanced FoD Upgrade for remote presence (graphics, keyboard and mouse, and virtual media).
Video	Matrox G200eR2 with 16 MB memory that is integrated into the IMM2. Maximum resolution is 1600x1200 at 75 Hz with 16 M colors.
Security features	Power-on password, administrator password, and Trusted Platform Module.
Operating systems supported	Microsoft Windows Server 2008 R2, 2012, 2012 R2; RHEL 5; SLES 11 & 12; VMware ESX 5.1, 5.5; (no USB 3.0 support for RHEL 5.1 or VMware ESX 5.1, 5.5).
Limited warranty	One-year customer replaceable unit and onsite limited warranty with 9x5/ next-business-day (NBD) response time.
Service and support	Optional service upgrades available through ServicePac offerings: 24x7/NBD or four hours onsite repair, 1-year or 2-year warranty extension, remote technical support for Lenovo hardware and selected Lenovo and third-party (Microsoft, Linux, VMware) software.
Dimensions	Compact tower: Height: 360 mm (14.2"), width: 180 mm (7.1"), depth: 480 mm (18.9") Standard tower: Height: 439 mm (17.3"), width: 217 mm (8.6"), depth: 569 mm (22.4")
Weight	Compact tower: Minimum configuration: 10 kg (22.0 lb), maximum: 13 kg (28.7 lb) Standard tower: Minimum configuration: 19.6 kg (43 lb), maximum: 22 kg (48.5 lb)

The x3100 M5 servers are shipped with the following items:

- Statement of Limited Warranty.
- Important Notices.
- Documentation CD that contains the *Installation and Service Guide.*
- Country-specific models might have one or two country-specific power cords.

Standard models

Processor options

The server supports only one processor, which is already installed in all standard and Express models. No additional processor options are available. The following table lists all processors that are available in standard models of x3100 M5 or through configure-to-order (CTO). If there is no corresponding *where-used* model for a particular processor, then that processor is only available through the CTO process or special bid.

Memory options

Lenovo DDR3 memory is compatibility tested and tuned for optimal System x performance and throughput. Lenovo memory specifications are integrated into the light path diagnostics for immediate system performance feedback and optimum system uptime. From a service and support standpoint, Lenovo memory automatically assumes the system warranty, and Lenovo provides service and support worldwide.

The x3100 M5 has four DIMM slots, and only DDR3 ECC UDIMMs are supported. The CPU has two memory channels, and there are two DIMMs per channel.

Configuration rules: If you plan to install more than one DIMM, then the DIMMs must be installed in a pair, and both DIMMs in a pair must be identical in type and size.

The following table lists the memory options that are supported by the server.

Table 5. Memory options

Part number	Feature code	Description	Maximum supported	Standard models where used
00D5012	A3QB	4GB (1x4GB, 2Rx8, 1.35V) PC3L-12800 CL11 ECC DDR3 1600MHz LP UDIMM	4	A3x, B3x, C3x, C5x, EAx, F3x

Internal drives

Models of the x3100 M5 with the compact tower form factor (and either a 300 W or a 350 W fixed power supply) support up to four 3.5-inch simple-swap SATA hard disk drives, as shown in the following figure.

Figure 6. Simple-swap drive bays of the compact tower models (accessible with the front bezel removed)

The following table lists the supported 3.5-inch hard disk drive options.

Controllers for internal storage

The Integrated ServeRAID C100 disk controller offers RAID 0, 1, and 10 standard. The ServeRAID C100 is an integrated SATA controller with software RAID capabilities. It is a cost-effective way to provide reliability, performance, and fault-tolerant disk subsystem management to help safeguard your valuable data and enhance availability. The ServeRAID C100 has the following specifications:

- Supports RAID levels 0, 1, and 10
- Onboard SATA controller with software RAID capabilities
- Supports 3 Gbps SATA ports
- Support for up to two virtual drives
- Support for virtual drive sizes greater than 2 TB
- Fixed stripe unit size of 64 KB
- Support for MegaRAID Storage Manager management software

The following table lists the RAID controller and internal HBAs that are supported by the server.

Table 9. RAID controllers and HBAs for internal storage

Part number	Feature code	Description	Maximum supported	Standard models where used
Integrated	None	ServeRAID C100 for System x	1	All other models
81Y4492	A1XL	ServeRAID H1110 SAS/SATA Controller	1	C5x, EEx
81Y4448	A1MZ	ServeRAID M1115 SAS/SATA Controller	1	F3x, EGx, EHx, EJx

* A cache option (81Y4484, 81Y4487, or 81Y4559) must be selected.
** For the standard tower chassis only (hot-swap power supplies). Not supported in the compact tower chassis.

The following table lists chassis upgrades for RAID controllers.

Table 11. Chassis upgrades

Part number	Feature code	Description	Maximum supported	Models where used
00J6352	A49A	System x3100 3.5" Simple Swap HDD Hardware RAID upgrade kit For the compact tower chassis only (fixed power supply) to enable support of RAID controllers; if selected then one of the following controllers is required: ServeRAID M1115, ServeRAID H1110, or N2115 HBA. Not supported the standard tower chassis.	1	-
00J6455	A3SE	System x3100 Hardware RAID Remote Battery/Cap Mechanical kit For the standard tower chassis only (hot-swap power supplies) to provide a housing for a battery or flash backup unit; required if the battery upgrade (81Y4508) or a flash upgrade is selected. Not supported in the compact tower chassis.	1	EKx

http://www.redbooks.ibm.com/portals/systemx?Open&page=pg&cat=raid

Internal backup units

The server supports the internal tape drive options that are listed in the following table. Internal tape drives are installed in a 5.25-inch HH bay. A maximum of one tape drive is supported. SAS tape drives require an internal SAS HBA to be installed in server. USB tape drives are connected to the dedicated USB tape drive connector on the system board.

Table 12. Internal tape drives

Part number	Feature code	Description	Maximum supported
49Y9898	5345	Half High LTO Gen 5 SAS Tape Drive*	1
00D2786	A2VE	RDX Internal USB 3.0 Dock with 320GB Cartridge	1
00D2787	A2VF	RDX Internal USB 3.0 Dock with 500GB Cartridge	1
00D2788	A2VG	RDX Internal USB 3.0 Dock with 1TB Cartridge	1

* Requires N2115 SAS/SATA HBA for System x (46C8988) or 6Gb SAS HBA (46M0907)

For more information, see the list of Lenovo Press Product Guides in the Backup units category:
http://www.redbooks.ibm.com/portals/systemx?Open&page=pg&cat=tape

Optical drives

The server supports the optical drive options that are listed in the following table.

Table 13. Optical drives

Part number	Feature code	Description	Maximum supported	Standard models where used
None*	4154	Half-High SATA DVD-ROM	1	A3x, B3x, C3x, EAx
81Y6404	4155	Half-High SATA Multi-Burner	1	All other models

* This option is only available through CTO or is already installed in standard models.

The Half-High SATA DVD-ROM supports the following media and speeds for reading:

- CD-ROM 48X
- CD-DA (DAE) 40X
- CD-R 48X
- CD-RW 40X
- DVD-ROM (single layer) 16X
- DVD-ROM (dual layer) 12X
- DVD-R (4.7 GB) 16X
- DVD-R DL 12X
- DVD+R 16X
- DVD+R DL 12X
- DVD-RW (4.7 GB) 12X
- DVD+RW 12X
- DVD-RAM (4.7/9.4 GB) 6X

The Half-High SATA Multi-Burner supports the same media and speeds for reading as HH DVD-ROM. In addition, this drive supports the following media and speeds for writing:

- CD-R 24X
- CD-RW 4X
- High Speed CD-RW 10X
- Ultra Speed CD-RW 16X
- DVD-R 8X
- DVD-R DL 8X
- DVD+R 8X
- DVD+R DL 8X
- DVD-RW 6X
- DVD+RW 8X
- DVD-RAM 3X

I/O expansion options

The server offers four PCI Express expansion slots. The form-factors of available slots are as follows. This applies to both the compact tower chassis and the standard tower chassis.

- Slot 1, PCIe 3.0 x16 (x8 wired), full-height, half-length
- Slot 2, PCIe 3.0 x8 (x8 wired), full-height, half-length
- Slot 3, PCIe 2.0 x8 (x4 wired), full-height, half-length
- Slot 4, PCIe 2.0 x4 (x1 wired), full-height, half-length

Network adapters

The x3100 M5 offers two integrated Gigabit Ethernet ports. One port is shared with Integrated Management Module II (IMM2), implementing Network Controller-Sideband Interface (NC-SI). The integrated NICs have the following features:

- Broadcom BCM5717 chip
- TCP/IP Offload Engine (TOE) support
- Wake on LAN support, Jumbo frame support
- Receive side Scaling (RSS) and Transmit side Scaling (TSS) support
- MSI and MSI-X capability- up to five MSI-X vectors
- VLAN tag support (IEEE 802.1Q), Layer 2 priority encoding (IEEE 802.1p)
- Link aggregation (IEEE 802.3ad) and Full-duplex flow control (IEEE 802.3x)
- IP, TCP, and UDP checksum offload (hardware based) on Tx/Rx over IPv4/IPv6
- Hardware TCP segmentation offload over IPv4/IPv6
- NIC Teaming (Load Balancing and Failover)

The following table lists additional supported network adapters.

PCIe SSD adapters

The server does not support High IOPS SSD adapters.

Power supplies

Compact tower models either come with a single fixed 350 W ac power supply or a single fixed 80 PLUS Bronze 300 W ac power supply. There are no additional power supply options.

Standard tower models offer one or two hot-swap 430 W ac power supplies, which are 80 PLUS Silver certified. For models with only one power supply, the part number to order a second power supply is listed in the following table. Two power supplies that are installed form a redundant pair.

Table 16. Hot-swap power supply option

Part number	Feature code	Description	Maximum supported
00D3821	A2Z0	430W Redundant Power Supply	1

Fans and cooling

Both the compact tower design (with a single fixed power supply) and the standard tower design (with hot-swap power supplies) come with one or two speed-controlled non-redundant fans, model dependent (see Table 2). The second fan is required if two or more adapters are installed, and the fan is configured by selecting the appropriate Thermal Solution Fan Kit, as listed in the following table.

If you want to operate the server in an environment up to 40°C (104°F), use the optional Operating Temperature Enhancement Kit that is listed in the table. This kit contains an additional thermal sensor.

Table 17. Cooling options

Part number	Feature code	Description	Maximum supported
For compact tower systems (with a fixed power supply)			
46W9177	A3SF	System x3100 Thermal Solution Fan kit for 4U Tower	1
00Y8197	A49B	System x3100 Operating Temperature Enhancement Kit for 4U Tower	1
For standard tower systems (with hot-swap power supplies)			
00Y8200	A49D	System x3100 Thermal Solution Fan kit for 5U Tower	1
00FK940	A49C	System x3100 Operating Temperature Enhancement Kit for 5U Tower	1

Integrated virtualization

The server supports VMware ESXi installed on a USB memory key. The key is installed in a USB socket inside the server. The following table lists the virtualization options.

Table 18. Hot-swap power supply option

Part number	Feature code	Description	Maximum supported
41Y8298	A2G0	Blank USB Memory Key for VMware ESXi Downloads	1
41Y8385	A584	USB Memory Key for VMware ESXi 5.5	1

Remote management

The server contains Integrated Management Module II (IMM2), which provides advanced service-processor control, monitoring, and an alerting function. If an environmental condition exceeds a threshold or if a system component fails, the IMM2 lights LEDs to help you diagnose the problem, records the error in the event log, and alerts you to the problem. Optionally, the IMM2 also provides a virtual presence capability for remote server management capabilities.

The IMM provides remote server management through industry-standard interfaces:

- Intelligent Platform Management Interface (IPMI) Version 2.0
- Simple Network Management Protocol (SNMP) Version 3
- Common Information Model (CIM)
- Web browser

The optional Integrated Management Module Advanced Upgrade is required to enable the remote presence and blue-screen capture features. The remote presence feature provides the following functions:

- Remotely viewing video with graphics resolutions up to 1600x1200 at 75 Hz with up to 23 bits per pixel colors, regardless of the system state
- Remotely accessing the server using the keyboard and mouse from a remote client
- Mapping the CD or DVD drive, diskette drive, and USB flash drive on a remote client, and mapping ISO and diskette image files as virtual drives that are available for use by the server
- Uploading a diskette image to the IMM memory and mapping it to the server as a virtual drive

The blue-screen capture feature captures the video display contents before the IMM restarts the server when the IMM detects an operating-system hang condition. A system administrator can use the blue-screen capture to assist in determining the cause of the hang condition. The following table lists the remote management option.

Table 19. Remote management option

Part number	Feature code	Description	Maximum supported	Models where used
90Y3901	A1ML	Integrated Management Module Advanced Upgrade	1	-

Supported operating systems

The server supports the following operating systems:

- Microsoft Windows Server 2008 R2
- Microsoft Windows Server 2012
- Microsoft Windows Server 2012 R2
- Red Hat Enterprise Linux 5 Server Edition
- Red Hat Enterprise Linux 5 Server x64 Edition
- SUSE Enterprise Linux Server (SLES) 12
- SUSE LINUX Enterprise Server 11 for AMD64/EM64T
- SUSE LINUX Enterprise Server 11 for x86
- SUSE Linux Enterprise Server 12 with XEN
- Toshiba 4690 Operating System V6
- VMware vSphere 5.1 (ESXi)
- VMware vSphere 5.5 (ESXi)

For the latest information about the specific versions and service levels that are supported and any other prerequisites, see the ServerProven® website:

Warranty options

The x3100 M5 has a 1-year onsite warranty with 9x5/NBD terms. Lenovo offers warranty service upgrades through ServicePac offerings. The ServicePac is a series of prepackaged warranty maintenance upgrades and post-warranty maintenance agreements with a well-defined scope of services, including service hours, response time, term of service, and service agreement terms and conditions.

ServicePac offerings are country-specific. Each country might have its own service types, service levels, response times, and terms and conditions. Not all covered types of ServicePac offerings might be available in a particular country. For more information about ServicePac offerings that are available in your country, see the ServicePac Product Selector at:
https://www-304.ibm.com/sales/gss/download/spst/servicepac

In general, the types of ServicePac offerings are:

- Warranty and maintenance service upgrades
  - One, 2, 3, 4, or 5 years of 9x5 or 24x7 service coverage
  - Onsite repair from next business day to 4 or 2 hours (selected areas)
  - One or two years of warranty extension
- Remote technical support services
  - One or three years with 24x7 coverage (severity 1) or 9x5/NBD for all severities
  - Installation and startup support for System x servers
  - Remote technical support for System x servers
  - Software support - Support Line
    - Microsoft or Linux software
    - VMware
    - IBM Systems Director

The following table explains warranty service definitions in more detail.

Table 20. Warranty service definitions

Term	Description
Onsite repair	A service technician comes to the server's location for equipment repair.
24x7x2 hour	A service technician is scheduled to arrive at your customer’s location within two hours after remote problem determination is completed. We provide service around the clock, every day, including holidays.
24x7x4 hour	A service technician is scheduled to arrive at your customer’s location within four hours after remote problem determination is completed. We provide service around the clock, every day, including holidays.
9x5x4 hour	A service technician is scheduled to arrive at your customer’s location within four business hours after remote problem determination is completed. We provide service from 8:00 a.m. - 5:00 p.m. in the customer's local time zone, Monday through Friday, excluding holidays. If after 1:00 p.m. it is determined that onsite service is required, the customer can expect the service technician to arrive the morning of the following business day. For noncritical service requests, a service technician arrives by the end of the following business day.
9x5 next business day	A service technician is scheduled to arrive at your customer’s location on the business day after we receive your call, following remote problem determination. We provide service from 8:00 a.m. - 5:00 p.m. in the customer's local time zone, Monday through Friday, excluding holidays.

Regulatory compliance

The server conforms to the following international standards:

- ASHRAE A3
- FCC - Verified to comply with Part 15 of the FCC Rules, Class A
- Canada ICES003, issue 5, Class A
- UL/IEC 60950-1
- CSA C22.2 No. 60950-1
- NOM-019
- Argentina IEC60950-1
- Japan VCCI, Class A

External disk storage expansion

The x3100 M5 supports attachment to external storage expansion enclosures, such as the EXP2500 series, by using either the ServeRAID M5225 or ServeRAID M5120 RAID controllers. The server can also be attached to supported external storage systems by using a supported HBA.

* The ServeRAID M5100 Series Battery Kit (81Y4508) is supported only with ServeRAID M5100 Series 512MB Cache/RAID 5 Upgrade (81Y4484).
† The ServeRAID M5100 Series RAID 6 Upgrade (81Y4546) requires a cache upgrade (either 81Y4484, 81Y4487, or 81Y4559).
** For the standard tower chassis only (hot-swap power supplies). Not supported in the compact tower chassis.

The ServeRAID M5225-2GB SAS/SATA Controller has the following specifications:

- Eight external 12 Gbps SAS/SATA ports
- Two external x4 mini-SAS HD connectors (SFF-8643)
- Supports RAID levels 0, 1, 10, 5, 50 standard
- Optional support for RAID 6 and 60 with the M5200 Series RAID 6 Upgrade
- 2 GB flash-backed cache standard
- PCIe x8 3.0 host interface
- Based on the LSI SAS3108 12 Gbps ROC controller

The ServeRAID M5120 SAS/SATA Controller has the following specifications:

- Eight external 6 Gbps SAS/SATA ports
- Two external x4 mini-SAS connectors (SFF-8088)
- Supports RAID levels 0, 1, and 10
- Supports RAID levels 5 and 50 with optional M5100 Series RAID 5 upgrades
- Supports RAID 6 and 60 with the optional M5100 Series RAID 6 Upgrade
- Supports 512 MB battery-backed cache or 512 MB or 1 GB flash-backed cache
- 6 Gbps throughput per port
- PCIe x8 Gen 3 host interface
- Based on the LSI SAS2208 6 Gbps ROC controller
- Supports connectivity to the EXP2512 and EXP2524 storage expansion enclosures

For more information, see the Lenovo Press Product Guide *ServeRAID M5120 SAS/SATA Controller for System x* at:
http://www.redbooks.ibm.com/abstracts/tips0858.html?Open

The ServeRAID M5120 SAS/SATA Controller supports connectivity to the external expansion enclosures that are listed in the following table. Up to nine expansion enclosures can be daisy-chained per one M5120 external port. For better performance, distribute expansion enclosures evenly across both M5120 ports.
